

# METHOD AND SYSTEM FOR REMOTE TELEVISION REPLAY CONTROL

## ABSTRACT OF THE DISCLOSURE

[0197] A method, system, computer medium, and other embodiments for integrating unrelated web hosted services with stand-alone media-based devices are provided. Users can access and control the media-based device conveniently with a web-browser through various portals on the Internet. An application program interface allows the various web servers and portals to take advantage of the system. In one embodiment, users access the media-based device through one or more unrelated web portals, so as to control and to program the media-based device in a single web session, and to see information both stored on the media-based device and originating from third-party online sources of information and services in a single integrated presentation.
